## SUMMARY

Even though my previous experience was in film and TV production, I decided to change my career after learning how to code. I enjoy the analytical and problem solving aspects that came with coding. I'm currently a graduate student in computer science and particularly interested in deep learning. I can work in both team and individual settings, with strong work ethic and drive to success.

## TECHNICAL PROFILE

**Languages:** Python, HTML, CSS, JavaScript, SQL

**Libraries:** PyTorch, Keras, OpenCV

**Other:** Microsoft Office Suite, Keynote
